

Exercise - Working with Glossaries

Sukhjit Singh Sehra and Sumeet Kaur Sehra

5th August, 2021

The Latex typesetting markup language is specially suitable for documents that include mathematics. Formulas are rendered properly and easily once one gets used to the commands.

After you have defined the terms, to use them while you are typing your LaTeX file use one of the commands describe below:

`\gls` To print the term, lowercase.

`\Gls` The same as `\gls` but the first letter will be printed in uppercase.

`\glspl` The same as `\gls` but the term is put in its plural form. For instance,

`\Glspl` The same as `\Gls` but the term is put in its plural form. For example,

Given a set of numbers, there are elementary methods to compute its Greatest Common Divisor, which is abbreviated GCD. This process is similar to that used for the Least Common Multiple (LCM).

Abbreviations

G

GCD Greatest Common Divisor. 1

L

LCM Least Common Multiple. 1

Glossary

F

formula A mathematical expression. 1

L

latex Is a mark up language specially suited for scientific documents. 1

M

mathematics Mathematics is what mathematicians do. 1
